Welcome to the Port of Juneau

Beginning March 25, 2020 at 12:01am, the State of Alaska requires all out-of-state travelers to quarantine for 14 days after arrival.

SIGNS & SYMPTOMS

Patients with COVID-19 have experienced mild to severe respiratory illness. Symptoms can include:

**FEVER
COUGH
SHORTNESS OF BREATH**

These symptoms may appear 2-14 days after exposure. If you get sick with fever (>100.3°F), cough, or shortness of breath, please call your health care provider. If you seek medical care for other reasons, such as dialysis, call ahead to tell your doctor and tell them about your recent travel.

More information is available from the Centers for Disease Control and Prevention at coronavirus.gov

SCREENING HOTLINE

If you do not have a primary healthcare provider, Juneau residents can call the new Capital City Fire/Rescue COVID-19 screening hotline:

**586-6000
NOON - 6:00PM**

A healthcare worker will help you complete the screening survey. If you qualify for testing, you will be contacted to arrange an appointment at the CCFR drive-thru testing center at the Hagevig Fire Training Center.

Due to limited supplies, testing is currently only available for individuals meeting strict criteria. At this time, we are not able to accommodate patients who arrive at the testing center without referrals from their primary care providers or the screening hotline. **Testing is by appointment only.**

Have a non-clinical question about COVID-19? Call 2-1-1. Alaska 211 can help the public with questions about COVID-19 and refer callers to appropriate resources. For Alaskans who live in areas where 2-1-1 cannot be accessed, call 800-478-2221.
